

Pendyala Gowtham

Analyst/Software Engineer

Base Location: Bangalore

Email ID: pendyala.gowtham@capgemini.com

Mobile No: +91 7286088453

Grade: A4

Strengths

- Software Engineer who is Strong in design and integration with intuitive problem-solving skills. Passionate about implementing and launching new projects.
- Ready to learn new technologies and implement them to further improve my knowledge.
- Eager to work in a team of dedicated people and serve a key role in the enhancement and development of the project.
- Has working knowledge on ReactJS and Java Microservice Development using Spring framework on an intermediate level.
- Worked on Spring boot Application, JWT authentication, Swagger UI , Spring API and Eureka Server.

Achivement

On Demand Car Wash System Web Application

Developed a web application which solves long term problem of time consuming physical car washing system. Using this application anyone can book a wash for their car cars at any place at any time.

I used the MongoDB as database, Microservice architecture for agility ,JWT authentication as security and ReactJS for responsive website.

Object Detection with Yolo Using Python

In this project, I proposed a method for object detecting using a trained yolo dataset. This model uses the deep CNN architecture. The methodology involves comparing the features of input images using a trained dataset.

This model is simple to construct and can be trained directly on full images. YOLO also generalizes well to new domains making it ideal for applications that rely on fast, robust object detection.

Education and certificates

Bachelor of Engineering : 2018 - 2022

Skills

Core Java 11
Spring Core
Spring Boot
Spring MVC
Spring REST
Spring Security
ReactJs
Cloud Microservices

Full Stack

ReactJ
MongoDB

Database

No SQL database – MongoDB

Web Technologies

HTML5
CSS3
Javascript

AddOns

Github
Maven
Postman

Additional Details

Leadership
Excellent Communication Skills
Team management
